
11 Nanotechnology as a Way for Bio-based and Biodegradable Food Packaging with Enhanced Properties

*Miguel A. Cerqueira, Pablo Fuciños,
and Lorenzo M. Pastrana*

CONTENTS

11.1	Introduction	234
11.2	Bio-Based and Biodegradable Materials for Packaging	236
11.2.1	Bio-Based Packaging Materials Extracted from Biomass.....	237
11.2.1.1	Polysaccharides.....	237
11.2.1.2	Proteins	238
11.2.1.3	Lipids	239
11.2.2	Bio-Based Packaging Materials Synthesized by Biotechnological or Chemical Routes	239
11.3	Nanostructures for Packaging.....	240
11.3.1	Nanoparticles	241
11.3.2	Nanocrystals and Nanofibers.....	242
11.3.3	Nanolayers	243
11.4	Active Packaging	244
11.4.1	Antimicrobial Active Packaging	245
11.4.2	Packaging Systems for Preventing Oxidation.....	247
11.5	Intelligent Packaging	248
11.5.1	Indicators	248
11.5.2	Biomaterials for Sensors and Data Carriers	249
11.6	Conclusion and Future Perspectives	250
	Acknowledgments.....	251
	References.....	251
